Intellimod™ Module
Application Specific IPM
50 Amperes/600 Volts

Description:

Powerex Application Specific IPMs (ASIPMs) are intelligent power modules that integrate power devices, gate drive and protection circuitry in a compact package for use in small inverter applications up to 20kHz. Use of application specific HVICs allow the designer to reduce inverter size and overall design time.

Features:

- Compact Packages
- 3-phase Converter Bridge Built-in
- Integrated HVICs
- Direct Connection to DSP/CPU

Applications:

- Small Motor Control
- Small Servo Motors
- General Purpose Inverters
- Pump and HVAC Motor Control

Ordering Information:

PS11037 is a 600V, 50 Ampere Application Specific Intelligent Power Module.

** Refer to the graph on next page.

*** Fault output signalling is given only when the internal OC, SC, and UV protection circuits are activated. The OC, SC and UV protection (and fault output) operate for the lower arms only. The OC and SC protection fault output is given in a pulse format while that of UV protection is maintained throughout the duration of the under-voltage condition.
