

ADP-SMAF-NF-B-W

N Jack to SMA Jack Sealed Bulkhead Adapter

The ADP-SMAF-NF-B-W is an N jack (female socket) to SMA jack sealed bulkhead adapter, and includes a silicone gasket, washer, and hex nut for sealed installation making it ideal for harsh-environment applications. Operating from 0 GHz to 11 GHz, the ADP-SMAF-NF-B-W provides superior performance in an N bulkhead adapter by utilizing white bronze plating to reduce distortion caused by passive intermodulation (PIM). Additionally, all Linx adapters meet RoHS lead free standards and are tested to meet requirements for corrosion resistance, vibration, mechanical and thermal shock.

Features

- 0 to 11 GHz operation
- White Bronze plating
 - Low Passive Intermodulation (PIM)
 - Superior corrosion resistance
- N jack (female socket) connection
 - Gold plated beryllium copper center contact
- Brass hex nut, washer and silicone gasket provided
- SMA jack (female socket) connection

Adapter Performance

Table 1 shows insertion loss and VSWR values for the ADP-SMAF-NF-B-W adapter at commonly used frequencies.

Insertion loss is the loss of signal power (gain) resulting from the insertion of a device in a transmission line. VSWR describes how efficiently power is transmitted through the adapter. A lower VSWR value indicates better performance at a given frequency.
